TropeTrainer 3.2

Complete Installation Guide

Windows XP Virtual Machine Setup

Version 1.0 • February 2026

Table of Contents

1. Introduction

TropeTrainer 3.2 is software for learning Torah cantillation (trope), developed by Thomas Buchler. The program was created in 2005 for Windows XP and is not functional on modern Windows versions (Windows 10/11) due to font encoding problems.

The only reliable solution is to run it in a Windows XP Virtual Machine (VM). This guide will walk you through the complete installation step by step.

1.1 System Requirements

- Windows 10 or 11 (64-bit)
- At least 4 GB RAM (8 GB recommended)
- 15 GB free disk space
- CPU with AMD-V or Intel VT-x support
- Internet connection for downloads

1.2 Required Downloads

1. Oracle VirtualBox (free)

Download: https://www.virtualbox.org/wiki/Downloads

Choose: Windows hosts (approx. 100 MB)

2. Windows XP Professional SP3 ISO

Download: https://archive.org/details/en_windows_xp_professional_with_service_pack_3_x86_cd_x14-80428_202501

File: en_windows_xp_professional_with_service_pack_3_x86_cd_x14-80428.iso (approx. 600 MB)

3. TropeTrainer 3.2 ISO

Download: https://archive.org/details/Trope_Trainer_Kinnor_Software_Inc._Version_3.2_2005

File: Trope Trainer (Kinnor Software, Inc.)(Version 3.2)(2005).iso (approx. 3 MB)

2. Phase 1: VirtualBox Installation

Estimated time: 5 minutes

1. Open the downloaded file **VirtualBox-x.x.x-Win.exe**
2. Click "Next" → "Next" → "Next"
3. At the warning *"Network Interfaces"* click **"Yes"**
4. Click "Install" and wait for installation to complete
5. Click "Finish" and launch VirtualBox

3. Phase 2: Enable Hardware Virtualization

Estimated time: 10 minutes

IMPORTANT: AMD-V (for AMD processors) or Intel VT-x (for Intel processors) must be enabled in BIOS!

3.1 Method A: Boot to BIOS from Windows (EASIEST METHOD)

6. Open **PowerShell as Administrator** (Windows + X → "Windows PowerShell (Administrator)")
7. Enter the following command: **`shutdown /r /fw /t 0`**
8. **WARNING:** Your computer will restart IMMEDIATELY! Save all open documents!
9. Press Enter → Computer boots directly to BIOS

3.2 Method B: Manual Boot (If Method A doesn't work)

10. Shut down computer completely (not restart!)
11. Turn on computer and **IMMEDIATELY** press one of these keys *repeatedly*:

- **Del** or **Delete** (most common for AMD systems)
- **F2**
- **F1, F10, Esc** (depending on manufacturer)

3.3 In BIOS: Enable AMD-V

Look for one of these menu items:

- **Advanced → CPU Configuration → SVM Mode**
- **Advanced → AMD CBS → SVM Mode**
- **M.I.T. → Advanced Frequency Settings → SVM Mode**
- **Chipset → SVM Mode**
- Or search for: *AMD-V, Virtualization Technology, Secure Virtual Machine*

12. Set the option to **[Enabled]**
13. Press **F10** → Select **"Save Changes and Exit"** → **Yes**
14. Computer restarts and AMD-V is now enabled ✓

 TIP: Use arrow keys to navigate, Enter to select, Esc to go back, F9 to reset to defaults.

4. Phase 3: Create Windows XP Virtual Machine

Estimated time: 10 minutes

4.1 VM Basic Configuration

15. Launch **Oracle VM VirtualBox**
16. Click **"New"** (blue gear icon)
17. Configure as follows:

- Name: **TropeTrainer XP**
- Type: **Microsoft Windows**
- Version: **Windows XP (32-bit)**

18. Click "Next"

19. Memory (RAM): **512 MB** (recommended) or 1024 MB if you have enough RAM → Next
20. Hard disk: **Create a virtual hard disk** → Create
21. Hard disk type: **VDI (VirtualBox Disk Image)** → Next
22. Storage: **Dynamically allocated** → Next
23. Size: **10 GB** → Create

4.2 Optimize VM Settings

24. Right-click on **"TropeTrainer XP"** → **"Settings"**

System:

- Processor: **2 CPUs** (if available)
- Acceleration: **Enable VT-x/AMD-V**

Display:

- Video Memory: **128 MB**
- 3D Acceleration: **Enable**

Storage:

- Under "Controller: IDE" → Click CD icon
- "Choose/Create a disk image" → "Add"
- Select the **Windows XP ISO file**
- OK

Audio:

- Enable Audio: ✓
- Host Audio Driver: **Windows DirectSound**

Network:

- Enable Network Adapter: ✓
- Attached to: **NAT**

25. Click **"OK"** to save settings

5. Phase 4: Install Windows XP

Estimated time: 20 minutes

26. Double-click **"TropeTrainer XP"** in VirtualBox
27. The VM starts and boots from the Windows XP ISO
28. Press **Enter** to start Windows XP Setup
29. License agreement: Press **F8** (Accept)
30. Partition: Press **Enter** (use entire disk)
31. Formatting: Choose **"Format with NTFS (Quick)"** → Enter
32. *Wait 10-15 minutes* while Windows XP copies and installs files
33. The VM will restart automatically

5.1 Windows XP Configuration

After restart, Windows configuration begins:

34. Region and Language: **English/United States** → Next
35. Name: *Your Name* → Next
36. Computer name: **TROPETRAINER** → Next
37. Administrator password: *Leave blank* (optional) → Next
38. Date and Time: *Correct if needed* → Next
39. Time Zone: **Your time zone** → Next
40. Network settings: **Typical settings** → Next
41. Workgroup: **WORKGROUP** → Next

Windows XP will finalize and restart. After about 5 minutes, the **Windows XP Desktop** appears ✓

6. Phase 5: Install Guest Additions

Estimated time: 5 minutes

IMPORTANT: Guest Additions improve performance, enable drag & drop, and shared folders!

42. In the running Windows XP VM: VirtualBox menu (top) → **"Devices"** → **"Insert Guest Additions CD image..."**
43. Windows XP detects the CD automatically and asks: *"What would you like Windows to do?"*
44. Choose: **"Run VBoxWindowsAdditions.exe"**

OR open: *My Computer → CD Drive (D:)* → Double-click **VBoxWindowsAdditions.exe**

45. Installation wizard: **Next → Next → Install**
46. At warning *"Hardware driver not signed"* → Click **"Continue Anyway"**
47. At the end: **"Reboot now"** → Finish
48. VM restarts

After restart, these features work:

- ✓ Drag & drop between Windows 10 and XP
- ✓ Better screen resolution
- ✓ Faster graphics
- ✓ Shared folders

7. Phase 6: Install TropeTrainer

Estimated time: 5 minutes

7.1 Mount TropeTrainer ISO in VM

49. In the running XP VM: VirtualBox menu → **"Devices"** → **"Optical Drives"** → **"Choose/Create a disk image..."**
50. Select the **TropeTrainer ISO file** (Trope Trainer (Kinnor Software, Inc.)(Version 3.2)(2005).iso)
51. Click "OK"

7.2 Run TropeTrainer Setup

52. In Windows XP: **My Computer → CD Drive (D:)**
53. Double-click **Setup.exe**
54. Installation wizard: **Next → Next**
55. Installation location: *Leave default* → Next
56. **Install** → Wait about 1 minute
57. **Finish**

7.3 Launch and Test TropeTrainer

58. Start → **Programs → Kinnor Software → Trope Trainer**
59. TropeTrainer opens
60. Open a Torah portion: *File → Open → Ki Sisa (or any other portion)*
61. **CHECK:** Are all Hebrew characters, vowel marks (nikud), and trope marks displayed correctly?

✓ **SUCCESS!** TropeTrainer runs perfectly in the Windows XP VM!

8. Tips & Tricks

8.1 Exchange Files Between Windows 10 and XP

Method 1: Drag & Drop (easiest method)

Simply drag files from Windows 10 desktop into the VM window!

Method 2: Shared Folders (recommended for regular exchange)

62. Shut down VM
63. Right-click on VM → **Settings → Shared Folders**
64. Click the plus icon (right side)
65. Folder Path: *C:\Users\YourName\Documents\TropeTrainer* (or another folder)
66. Folder Name: **TropeFiles**
67. ✓ **Auto-mount**
68. ✓ **Make Permanent**
69. OK → OK
70. Start VM
71. In XP: **My Computer → Network Drives → TropeFiles**

8.2 VM Snapshots (Backups)

VERY IMPORTANT: Create a snapshot when everything works!

72. Right-click on **"TropeTrainer XP"** → **"Snapshots"**
73. Name: **"TropeTrainer Works"**
74. Description: "Clean installation with working TropeTrainer"
75. Take

If problems occur: Right-click on VM → Snapshots → Choose "TropeTrainer Works" → Restore

8.3 Optimize VM Performance

If your computer has ≥ 8 GB RAM:

- Shut down VM → Right-click → Settings → System → Base Memory: **1024 MB**

Increase CPU cores (if available):

- System → Processor → Processor(s): **2**

8.4 Quick Start VM

Create desktop shortcut:

76. Right-click on "TropeTrainer XP" in VirtualBox
77. **"Create Shortcut on Desktop"**
78. Double-click desktop icon to start VM directly!

9. Troubleshooting

9.1 "VT-x is not available"

Problem: VM won't start, error message about VT-x/AMD-V

Solution:

79. Make sure AMD-V/Intel VT-x is enabled in BIOS (see Phase 2)
80. Restart computer after BIOS change
81. If Hyper-V is installed, disable it:

PowerShell (Admin): `Disable-WindowsOptionalFeature -Online -FeatureName Microsoft-Hyper-V-All`

9.2 Windows XP won't boot

Problem: VM starts but Windows XP doesn't boot from ISO

Solution:

82. Turn off VM
83. Right-click → Settings → Storage
84. Check if Windows XP ISO is correctly mounted
85. If needed: Remove ISO and add it again

9.3 Mouse doesn't work in VM

Problem: Mouse is captured in VM or doesn't work

Solution:

- Press the **right Ctrl key** to release the mouse
- Install Guest Additions (see Phase 5)

9.4 TropeTrainer still shows wrong characters

Problem: Hebrew characters are still not displayed correctly in the VM

Solution:

- **This should NOT happen in Windows XP!** If it does:

86. Verify you chose Windows XP (32-bit), not XP 64-bit
87. Uninstall TropeTrainer completely
88. Reinstall TropeTrainer

89. Use the "TropeTrainer Works" snapshot to return to the working version

10. Appendix

10.1 Technical Background

Why doesn't TropeTrainer work on Windows 10/11?

TropeTrainer 3.2 was developed in 2005 for Windows XP and uses proprietary fonts (TGBR, TGBT, TGBI, TGBS) with a legacy encoding system. These fonts are NOT Unicode-compatible.

Windows XP uses Code Page 1255 (Windows-1255) for Hebrew characters, while Windows 10/11 use Unicode (UTF-16) by default. The TropeTrainer fonts contain Hebrew glyphs, but they are mapped to incorrect Unicode codepoints.

Even after changing the system locale to Hebrew (Code Page 1255), TropeTrainer doesn't work because Windows 10/11 use a different font rendering system (DirectWrite instead of GDI).

The only reliable solution: Windows XP in a Virtual Machine, where the original font rendering system is available.

10.3 About TropeTrainer

TropeTrainer was developed by Thomas Buchler and distributed by Kinnor Software. Thomas Buchler passed away in July 2019, and Kinnor Software was closed. There is no more official support.

This software has helped thousands of Bar/Bat Mitzvah students and adults learn Torah cantillation. Thanks to Archive.org and virtual machine technology, this important learning software remains usable today.

Good luck with TropeTrainer!

If you have questions or problems:
Take screenshots and document the steps.
